

# Slow and steady may lose the race

Rapidly growing numbers of vehicles need fast responses.  
Slow improvements in emission standards will not check rapid pollution.

## For an IMMEDIATE IMPACT

- Ban private diesel cars
- Supply clean diesel
- Remove benzene from petrol
- Bring in CNG
- Introduce emissions warranty
- Set up smog alert emergency measures
- Make vehicle emission levels public
- Tax to improve technology and fuel

## For the LONG TERM

- Introduce zero emission vehicles
- Control the number of vehicles

**Wake up now or be mowed down by pollution**
